

The background of the slide is an abstract, three-dimensional grid of blue lines that curves and flows from the top left towards the bottom right, creating a sense of depth and movement. The lines are more densely packed in some areas and more spread out in others, with a gradient from dark blue to light blue.

Composing an Encrypted Email from your website

ZixPort Overview

ZixPort is a secure web-based messaging portal that integrates directly into your already-existing website. ZixPort provides fully-branded secure message functionality including the ability to compose, reply, delete and manage secure email messages between companies and their business partners and customers.

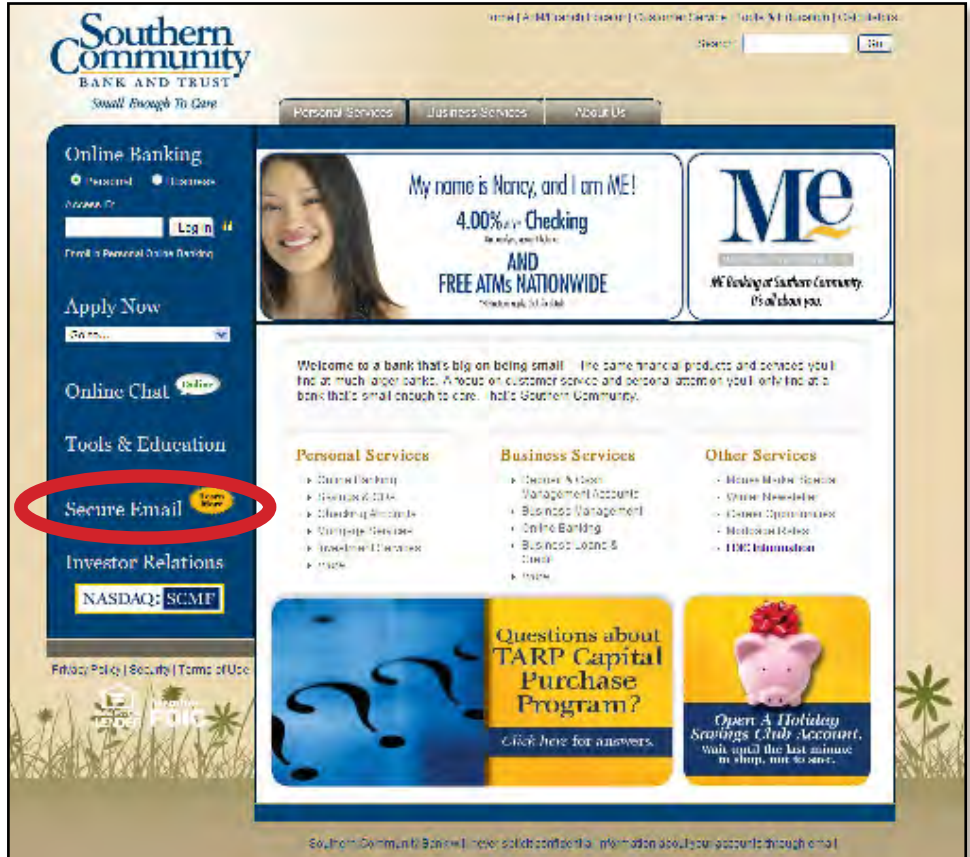

With ZixPort, external recipients can initiate an encrypted email message to your company via your website. To accomplish this, you can add a button or link on your website’s homepage or in your “Contact Us” section. Integrating ZixPort into your website will allow your business partners and customers to securely initiate an email to you, even if they don’t have email encryption capabilities themselves.

ZixPort, together with ZixMail or ZixGateway, provides guaranteed transparent and encrypted two-way communication, ensuring protection of private information and regulatory compliance.

Options for ZixPort integration into your company’s website

Option 1: Place a button or link on your Homepage:

Southern Community Bank and Trust, NC
www.smallenoughtocare.com

Pathways, PA
www.pathwaysswpa.org

Community Memorial Health, NE
www.syracusecmh.org/contact-us/secure-email

STAR Financial Group, IN
www.starfinancial.com/security-center

First Administrators, Inc.
www.firstadministrators.com/ContactUs/index.aspx

Travel & Transport, NE
www.tandt.com/contact.aspx

Once your customers or partners click that button or link, they will be led through a process that allows them to compose an encrypted email to your company. An example of how that process works follows.

Composing an encrypted email from ZixPort

Step-by-step example of a customer composing an encrypted email to Eagle Company.

Step 1

Your customer or business partner decides to send you an encrypted email.

They click the "Send Us A Secure Message" link from your homepage or "Contact Us" page.

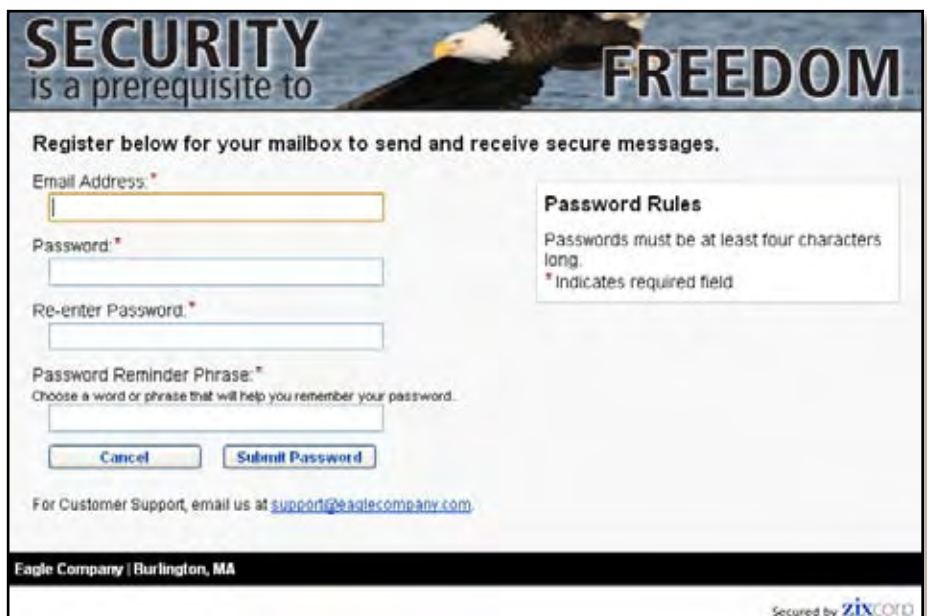

The sender is automatically brought to Eagle Company's custom secure portal.

Step 2

If this is the user's first time accessing this service, they will register to activate their personal secure email account.

The password rules criteria (simple to complex) are determined by you.

Step 3

User accesses their personal secure email service.

Step 4

User selects the "Compose" tab and determines to whom the email will be sent, based on Eagle Company's custom email distribution lists.

Step 5

User has the option of adding attachments of up to 50Mb to their secure email message.

Step 6

User is ready to send the encrypted email to Eagle Company.

The process is complete, and your customer's private information is protected from the threat of identity theft.

The next time your business partner or customer needs to send you information that needs to be encrypted, have them send it using your new email encryption service accessed through your company's website.

About ZixCorp

Zix Corporation is the only email encryption service designed with your most important relationships in mind. More than 1,200 hospitals and over 1,300 financial institutions, including the most influential companies and government organizations use ZixCorp's proven Email Encryption Service, including Wellpoint, Humana, the FDIC and the SEC. ZixCorp's Email Encryption Service is powered by ZixDirectory™, the largest email encryption community in the world. The 21 million members of the ZixDirectory can feel secure knowing their most important relationships, information, and communications are protected.
